2.Safety instructions:

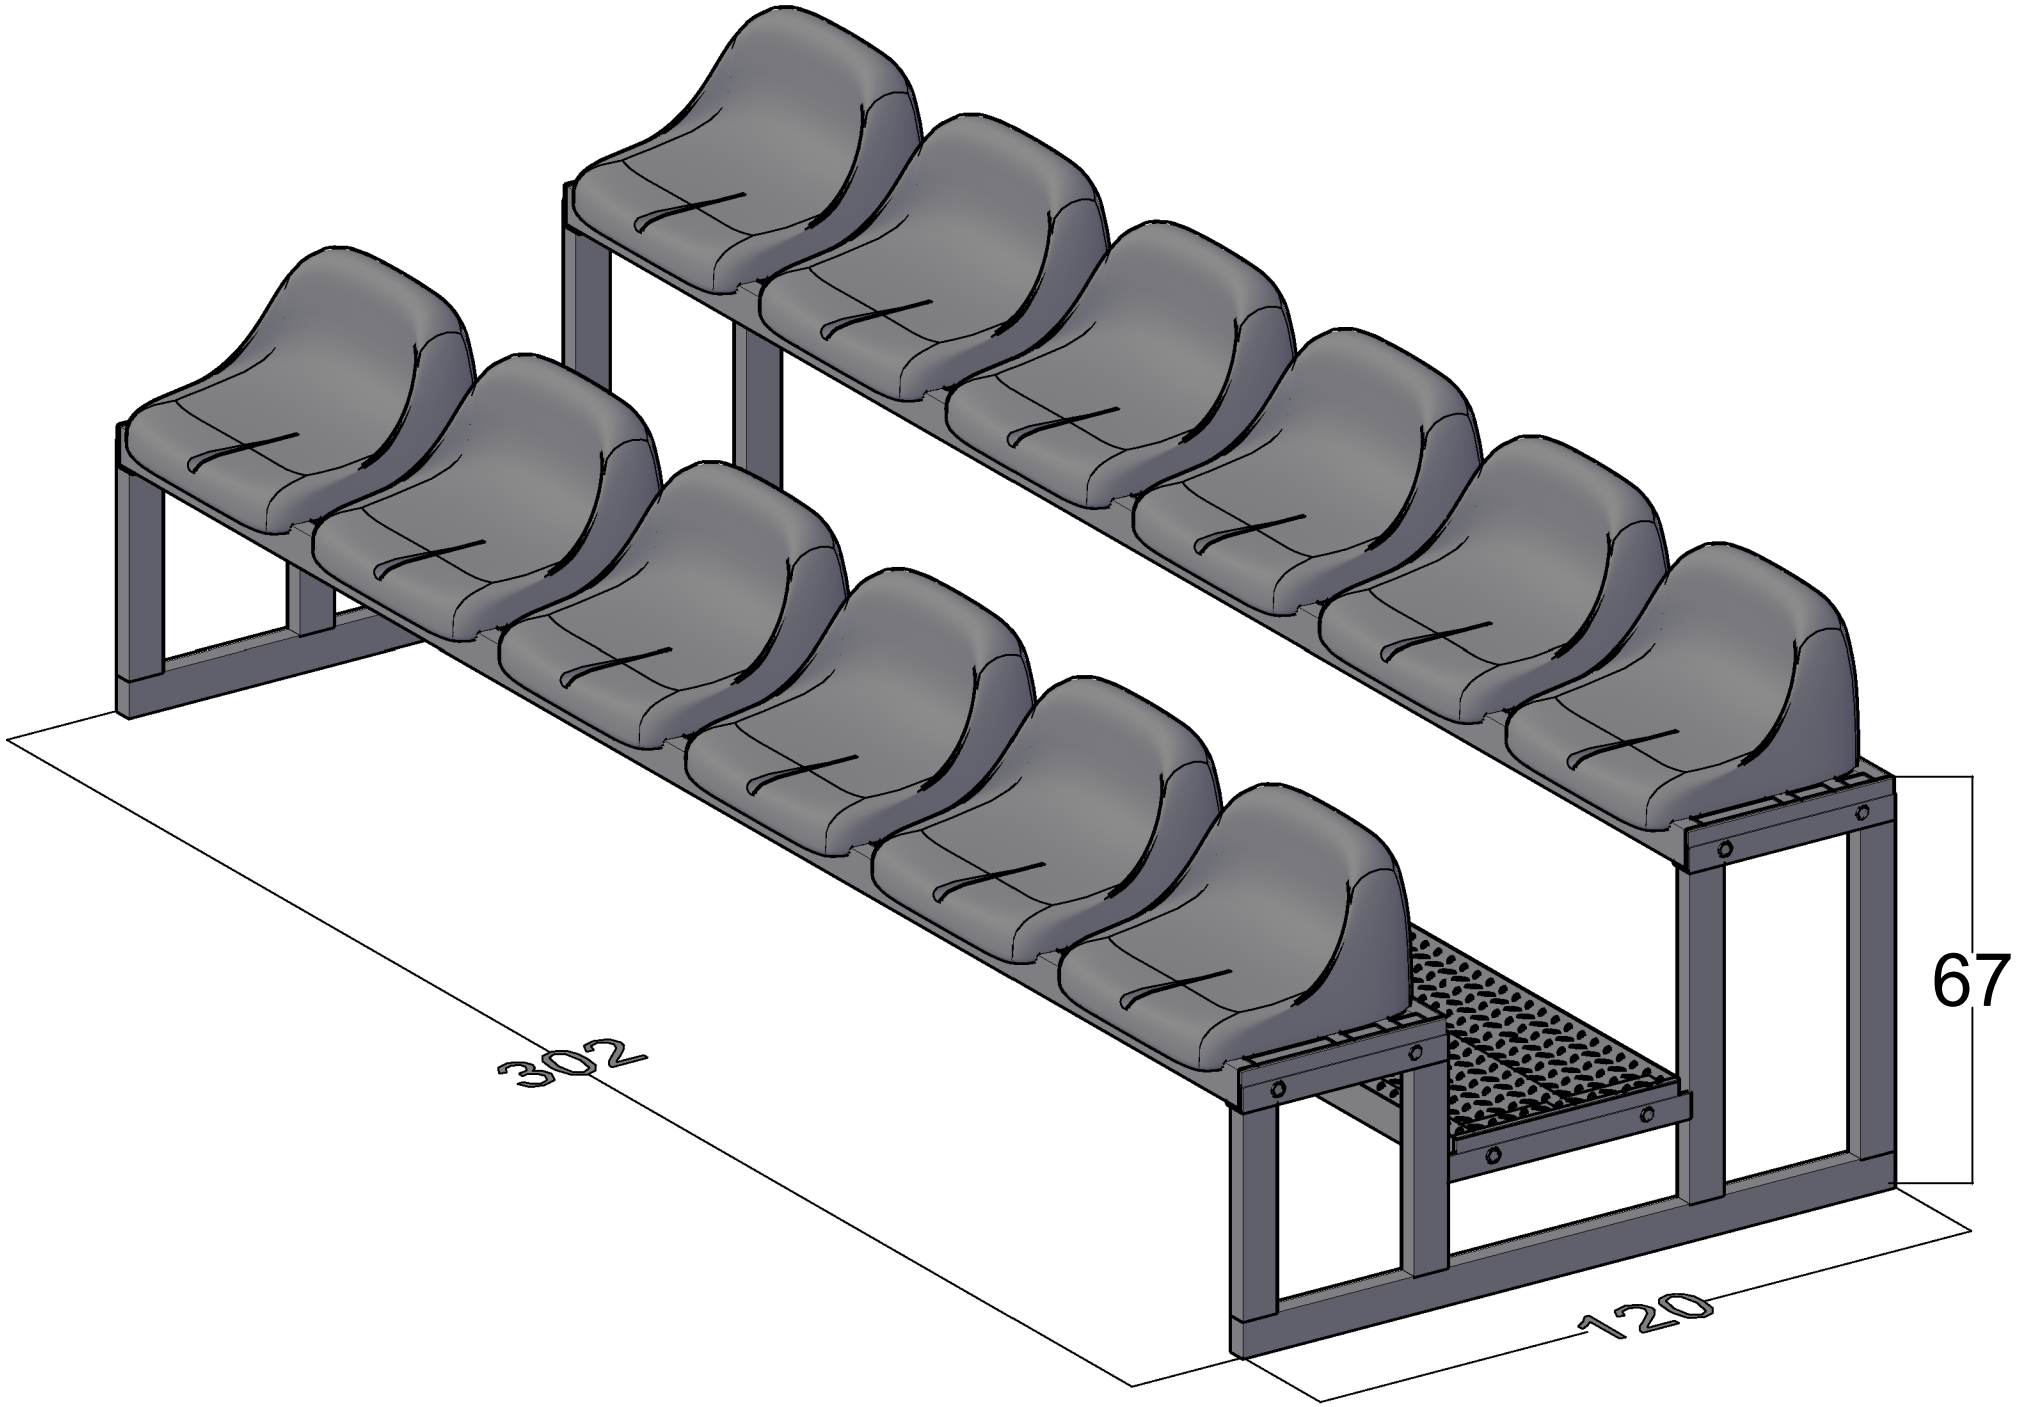

- Is not provided for handicapped persons!
- Should be mounted on flat surface with inclination <2% of the terrain. It is not allowed to put any object below the steel construction of the tribune!

- To be mounted on >1m of the end of the concrete/asphalt foundation in order to prevent any injury!
- It is not recommended mounting this facility directly on grass!

3. Maintaining information:

- Assembling the tribune should be performed only by competent person. (min. 4 pers)
- It is recommended to tighten the bolts for the assembly with a torque wrench with a torque of 31.8 N.m. This will reduce the risk of possible bolt breakage during frequent assembly and disassembly of the stand.
- During transportation, the tribune can be both assembled and disassembled.
- The person operating the stand must check that all fasteners are tight before each use to ensure its safety, but not less than once every six months.
- The person who manages the tribune is obliged to restrict access to it when it is not used and is unattended! Otherwise, possible vandalism could lead to serious damage to the structure.
- When using the tribune outside the daylight hours, its user is obliged to provide adequate lighting to ensure safe use.
